Conferences

EPS' high level physics conferences are an important activity. EPS Divisions and Groups organize many of Europe's best conferences. The EPS also sponsors conferences that meet specific criteria ensuring their relevance and quality.

Support Divisions and Groups

In 1999 EPS created a conference services department to support Divisions and Groups in the organisation of their conferences.

The Services

EPS provides other services for Divisions and Groups. All are aimed at helping physicists communication with their colleagues. EPS provides:

Secretarial, Financial, Information technology, Graphic Design, Communication services.

The Benefits

Using the Conference Department Services you will have the following benefits:

Increase membership; Financial Advantages; Professional Organisation; Good Communication

EPS Activities

The European Physical Society provides an international forum for physicists and acts as a federation of national physical societies. Founded in 1968, the EPS now has over 3400 physicists from a variety of occupations as Individual Members, and brings together 39 national physical societies, which represent 100.000 physicists from the countries of Europe that have an active physics community. Its activities revolve around the theme of promoting scientific excellence physics research, supplying a European view on important questions related to physics, and acting as a catalyst bringing together physicists in different countries and in different fields.
